The Translator's Invisibility will be essential reading for students of translation studies and social theory.

In Reflexive Translation Studies, Silvia Kadiu investigates the viability of theories that seek to empower translation by making visible its transformative dimension; for example, by championing the visibility of the translating subject, the translator's right to creativity, the supremacy of human translation or an autonomous study of translation. Inspired by Derrida's deconstructive thinking, Kadiu presents practical ways of challenging theories that argue reflexivity is the only way of developing an ethical translation. She questions the capacity of reflexivity to counteract the power relations at play in translation between minor and dominant languages, for example and problematizes affirmative claims about translation as a practice of resistance and reflection. In exploring the transforming power of context, Reflexive Translation Studies promotes the need for an experimental, multi-sensory and intuitive practice, which invites students, scholars and practitioners alike to engage with theory productively and creatively through translation.

Introducing Translation Studies
This text guides the reader through the varying approaches to translation studies in the latter half of the 20th century. Chronologically ordered and divided into clear sections, it collects together key essays, articles and book extracts.

Descriptive Translation Studies and Beyond
Social theories of the new cosmopolitanism have called attention to the central importance of translation, in areas such as global democracy, human rights and social movements, but translation studies has not engaged systematically with theories of cosmopolitanism. In Cosmopolitanism and Translation, Esperanza Jafri argues that translation can be an agent of change in the process of cultural cosmopolitanization. By focusing on the experiences of the cosmopolitan translator, this book offers a paradigm for understanding the role of translation in a world characterized by a diversity of social, cultural and linguistic contexts.

This workbook combines methodology and practice for beginning translators with a solid proficiency in French. It assumes a linguistic approach to the problems of translation and addresses common pitfalls, including the delineation of "translation units," word order, false cognates, and structural and cultural obstacles to literal translation. The first part of the book focuses on specific strategies used by professionals to counter these problems, including transposition, modification, equivalence, and adaptation. The second part of the book provides a global application of translation techniques in the topics sections, guiding the student through step-by-step translation of literary and non-fictional texts. The revised edition clarifies some of the finer points of the translation techniques introduced in the first edition, provides extra practice exercises, and offers information on a website that can be used in class.
